_____

EDUCATION

Florida Atlantic University   Boca Raton

Bachelor of Computer Science   December 2023

Minor in Artificial Intelligence

ACADEMIC PROJECTS

LibAR (Engineering Design, Fall 2022)

I worked on an augmented reality assistant application for the FAU library. LibAR uses an augmented reality assistant to aid students and staff with everything they need in the FAU library. Users can use hand gestures and voice commands with the HoloLens 2 device to book a study room, find a book, or for staff, to look at IT tickets. I was responsible for creating the component that allows the user to find a book.

- Tools used: Unity, HoloLens 2

Enliven (Principles of Software Engineering, Fall 2021)

Worked in React.js and Firebase to create a posts page to allow users to create posts. The website is a new platform where users can share anything they'd like, whether it be a link to an article on how to keep up a good routine during a lockdown, or just about anything they'd like to share with other users who are having a difficult time during the pandemic.

- Tools used: *REACT.JS, Firebase, VSC, CSS3*

TECHNICAL SKILLS

Languages: C/C++, JavaScript, PHP, SQL, Python

Web Development: HTML5, CSS3, REACT.JS, JQuery, ASP, ASP.NET

Operating Systems: Windows, Linux

Software: Visual Studio Code, Brackets, Jira, Slack, Android Studio, Postman, Unity

WORK EXPERIENCE

Eco Cleaners   Oakland Park, FL

IT/Help Desk   October 2019 - Present
- Use of Jira for tickets
- Network administration, computer hardware, and software applications
- Training employees with the system

Languages
- Fluent in English and French
